

Inspector Certification Program

Certify your inspectors with comprehensive training:

Module 1: OSHA Compliance Requirements

- Understanding 1910.178 standards
- Inspection frequency requirements
- Documentation standards

Module 2: Inspection Techniques

- Visual inspection methods
- Operational testing procedures
- Component-specific checks

Module 3: Defect Identification

- Critical vs. non-critical defects
- When to tag equipment out of service
- Proper defect documentation

Module 4: Report Generation

- Creating comprehensive reports
- Photo documentation requirements
- Digital vs. paper records

Manage inspector certifications through ForkliftTracker.
